Empowering Wealth Through Sustainability

Infintri is an innovative platform uniquely designed to connect wealth creation with sustainability. It empowers individuals worldwide to invest in Electric Vehicles (EV) and Solar Energy projects, generating profits every single minute. Unlike traditional investment models that provide daily or weekly returns, Infintri delivers a minute-by-minute ROI, creating transparency, trust, and continuous engagement.

But Infintri goes beyond just returns. Users can expand their income streams through referrals, binary income, and career progression bonuses, transforming every investor into both a beneficiary and a community leader. As one of the fastest growing sectors globally, renewable energy offers tremendous opportunity, and Infintri stands as the gateway for individuals to join the clean energy revolution while building lasting personal wealth.

About Us

Driven by Innovation

Infintri was founded with the goal of making sustainable investments accessible to everyone, regardless of financial background or location. We believe the future of wealth creation lies in the adoption of green energy, including solar power, electric vehicles, and eco-innovation.

Until now, access to these opportunities has been limited to large institutions. Infintri changes that. By leveraging blockchain technology, we provide a transparent, secure, and user friendly platform where individuals can invest confidently, track their earnings in real time, and reinvest seamlessly.

Together, we're not just investing in technology, we're building a global community committed to a cleaner, greener future while unlocking new pathways for personal financial growth.

Market Opportunity

The global economy is shifting towards renewable energy at an unprecedented pace:

- Electric Vehicles (EVs): By 2030, the EV market is projected to exceed \$1.1 trillion, driven by mass adoption, government incentives, and the rise of EV infrastructure such as charging networks.
- Solar Energy: Solar accounted for more than \$368 billion in 2023, with double-digit annual growth expected. Falling costs and global demand are accelerating adoption worldwide.

THIS CREATES A MASSIVE DUAL OPPORTUNITY:

01

Investors want reliable, high-yield, tech-driven opportunities.

02

The world needs capital to scale clean energy adoption.

SWOT ANALYSIS

S

Strengths

- Unique every minute ROI model, offering transparency and instant gratification.
- Multiple income streams (ROI, binary, referral, bonuses).
- Low entry barrier, investments start at just \$50.

W

Weakness

- Dependence on regulatory acceptance of crypto-based platforms.
- New brand requiring global trust-building.

O

Opportunity

- Explosive growth in EV and solar markets.
- Expansion into emerging markets with strong renewable adoption.
- Growing appetite for digital assets and gamified investing.

T

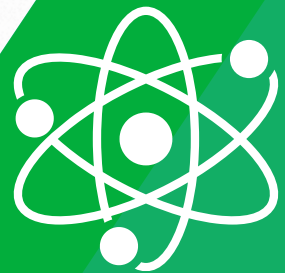

Threats

- Intense competition from traditional funds and fintech apps.
- Regulatory risks in certain jurisdictions.
- Market volatility in renewable energy and crypto sectors.

Guided by Purpose

01

Values

We believe in creating an inclusive and transparent platform that allows individuals from all backgrounds to confidently invest in green technologies. Our focus is on delivering sustainable returns that benefit both the investor and the environment.

02

Vision

To become the world's leading green investment platform, where people can build meaningful wealth while actively contributing to a cleaner, more sustainable planet.

03

Mission

To empower everyone to participate in electric vehicle and solar investments by providing a secure, accessible, and profitable ecosystem that supports long-term growth for both investors and the planet.

What Makes Us Different?

Traditional investments make you wait, for days, weeks, or even months, to see returns. Infintri changes the game by delivering ROI every single minute, giving users real-time growth and instant engagement.

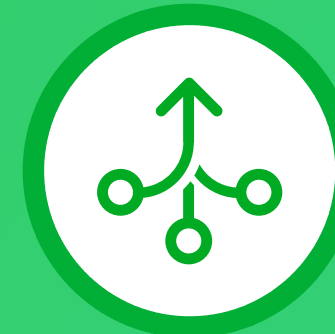

On top of that, our unique multi-wallet system, Power Wallet, Share Wallet, and Charge Wallet, offers unmatched flexibility and control, empowering users to manage their earnings efficiently while ensuring long-term sustainability.

Our approach has three major advantages:

Transparency

Investors see their money working in real-time.

Compounding

Faster reinvestment cycles accelerate wealth growth.

Engagement

Investors feel emotionally connected, watching earnings grow minute by minute.

Investment Opportunities

Infintri focuses on two of the most promising industries of our time:

Solar Energy

Investments in solar farms, power distribution projects, and innovative solar solutions.

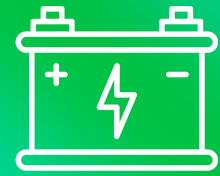

Electric Vehicles

Opportunities in EV fleets, charging infrastructure, and technology adoption.

Both industries are not only profitable but also aligned with global sustainability goals. By participating, investors are securing their financial future while making a tangible impact on the planet.

How We Generate The Profits

When you invest with Infintri, you are tapping into a proven, scalable revenue model that seamlessly integrates solar energy, electric vehicles, and long term, recurring profits. Here's how we ensure consistent, growing revenue for you

EV Charging Stations:

Each time an electric vehicle charges at one of our solar powered stations, we earn revenue based on kilowatt-hour (kWh) usage. As the demand for electric vehicles skyrockets, we are rapidly expanding our charging hubs, placing us at the forefront of the green energy economy.

Electric Vehicle Leasing:

Local businesses need eco-friendly, cost-efficient transportation for delivery and logistics. By leasing our solar powered vehicles, they cut fuel costs while you earn a steady stream of monthly payments, transforming the global shift to electric vehicles into long-term recurring income.

Energy Sales to Grids:

Excess energy generated from our solar farms is sold to local grids or used by nearby businesses. This additional revenue flows directly back to you, ensuring that your investment continues to grow on multiple fronts.

Carbon Credits and Green Incentives

As a clean operations leader, we qualify for carbon credits and government grants. These funds are reinvested and a portion is shared directly with investors like you, creating an ongoing cycle of revenue generation.

Together, these income channels work in perfect harmony, giving you a diversified and growing portfolio of revenue streams that weather market fluctuations and ensure consistent returns.

How We Share The Profits

At Infintri, investing is just the beginning, our goal is to help you maximize your earnings. Your capital doesn't stay idle, it's continuously at work, generating real-time returns.

Binary Income	10%
Capping Limit	Unlimited

ROI Distribution: Credited to Power Wallet every minute
ROI Withdrawal: Available every Saturday
Referral and Binary Income: Credited to Share Wallet (Withdrawable anytime).

The Advantage of Every Minute ROI

Traditional investing models are slow and often limit investor involvement. Unlike traditional funds that distribute returns daily or weekly, Infintri's real-time ROI model empowers investors to:

- See their returns grow every minute
- Withdraw earnings on a weekly basis
- Reinvest instantly to maximize compounding

This model boosts engagement and gives investors a sense of control and confidence that's unmatched in the market. It transforms passive investing into an active, rewarding experience.

Referral Income

Referral programs allow investors to earn **10% – 13%** commissions for every direct referral.

- Each new member brings immediate value.
- Rewards scale with the package level chosen by the referred investor.
- Commissions are credited instantly to the **Share Wallet** and can be withdrawn anytime.

This system transforms investors into ambassadors, creating a powerful network effect.

Binary Income

Binary Income is a powerful earning opportunity that rewards you for building and balancing your network. Every time new members join under your referral tree, their investment volume is split between two sides: Left Leg and Right Leg. You earn a **10%** commission on the business volume of the weaker leg.

How It Works

- Build your network by referring others.
- Every new investor is automatically placed in either your left or right leg.
- Total investment volume on both sides is calculated.
- Your income = **10%** of the weaker side's volume.

Total Deposits on Left Leg = \$6000

Total Deposits on Right Leg = \$9000

Binary Commission will be calculated from the left side as it's the weaker side

\$600 will be your Binary Income

Career Progression Plan

This plan rewards users as they build matching business volume on both left and right sides. As users reach higher milestones, they earn increasing bonuses, encouraging sustained network growth and leadership.

Slab	Matching Business Volume	Bonus
1	\$500 Left + \$500 Right	\$25
2	\$5,000 Left + \$5,000 Right	\$300
3	\$25,000 Left + \$25,000 Right	\$1,750
4	\$75,000 Left + \$75,000 Right	\$6,000
5	\$100,000 Left + \$100,000 Right	\$9,000
6	\$500,000 Left + \$500,000 Right	\$50,000
7	\$1,000,000 Left + \$1,000,000 Right	\$110,000
8	\$2,500,000 Left + \$2,500,000 Right	\$300,000
9	\$5,000,000 Left + \$5,000,000 Right	\$650,000
10	\$10,000,000 Left + \$10,000,000 Right	\$1,400,000

Wallet System

To elevate the user experience and offer greater financial flexibility, Infintri introduces an innovative multi wallet system designed to support both immediate access and long-term growth.

01 Power Wallet

Earn ROI every minute, withdrawable weekly for consistent cash flow.

02 Share Wallet

Accumulate referral and binary income, available for instant withdrawals.

03 Charge Wallet

Store career bonuses, dedicated exclusively for reinvestment and future growth.

Investment and Withdrawal Policy

Withdrawal Fee

A 10% fee is applied to every withdrawal transaction.

Deposits

Supports multiple cryptocurrencies, offering users flexibility and choice.

Withdrawals

Processed in USDT (BEP-20) for fast, secure, and globally accessible transactions.

Reinvestment Rule

Each reinvestment must be funded 50% from wallet balance and 50% from new crypto deposits, ensuring healthy and consistent capital inflow.

Legal Compliance and Security

Infintri operates as a fully registered and tax-paying company in the UK, committed to maintaining the highest standards of legal and financial responsibility. The platform is designed with transparency at its core, powered by blockchain technology that ensures every transaction is recorded and verifiable.

To protect user data and assets, Infintri employs end-to-end encryption across all transactions and wallets. The platform also strictly adheres to international crypto and investment regulations, offering users a secure, compliant environment for sustainable investing.

- Blockchain Powered Transparency
- Global Regulatory Compliance
